

ACCEPTED CERTIFICATIONS

VERSION 3

To avoid unnecessary duplication of audits, SANE recognizes and accepts selected credible existing standards. Material or facilities holding such certification will be exempt from auditing for the corresponding requirement.

If a material or a facility holds an accepted certification covering all SANE requirements, it can be certified SANE without additional audits.

If some of the SANE requirements are not covered by any of the material or facility certification(s), a partial audit will be required to assess those specific areas.
